

SuperDrive™

The Hygienic Positive-Drive Belt

The Next Step in Belting

We've found that the process of cleaning conveyor belts is easier and far more effective when performed on Volta Belting products such as the SuperDrive™.

Mr. David Kerhaghan of Johnson Diversey

Extremely Hygienic

The SuperDrive™ is homogeneous with extremely smooth operating surfaces. There are no mechanical parts, joints or crevices to harbor bacteria. The belt is FDA/USDA/3A-Dairy certified.

Easy to Clean

The SuperDrive's extremely smooth, cut and abrasion resistant surfaces ensure effective and easy cleaning.

Positive Drive

The positive-drive feature eliminates slippage and pretensioning requirements. This increases belt life and operating efficiency.

Eliminates Off-Tracking

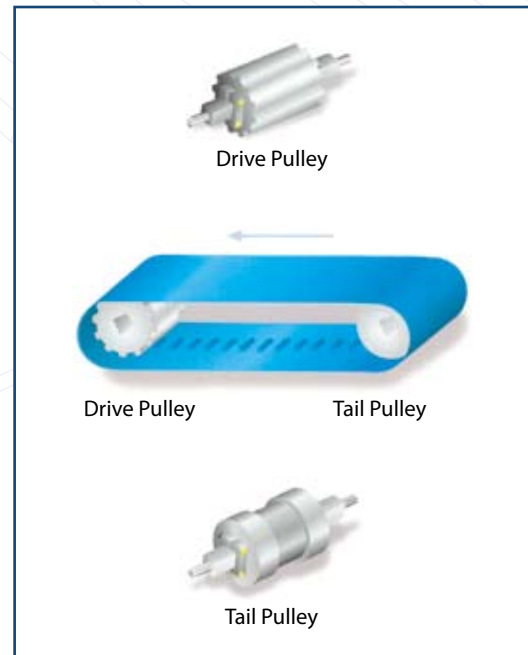

The integral teeth on the drive-side of the belt provide a natural guide system.

Reduced Operating Noise

Significant reduction of noise levels due to the elimination of the hard, rigid modular components.

Cost Savings

The ease of cleaning reduces both manpower requirements and chemical and water consumption. The homogeneous character of the belt eliminates product waste.
