V and Round (VaR) Tool Kits

The Next Step in Belting

TOOL KITS FOR WELDING V AND ROUND BELTS

VOLTA V and Round thermoplastic elastomer profiles (VaR) are renowned worldwide for their high quality. To ensure the high quality of the joins we recommend using the wide range of VOLTA VaR tools and tool kits. The VaR Easy Overlap welding kit is the most up-to-date welding tool dedicated to joining reinforced V and round TPE profiles. The Mini VaR Tool Kit is made for welding small section sizes of V and Round profiles. The W-1000 VaR welding kit is the universal welding kit that suits all normal and reinforced V and Round belts. This kit is packed in a rugged plastic case and presents an easy solution to all of your V and Round profile welding needs.

VaR Easy Overlap Welding Kit

VOLTA Overlap Welding Kit, The original welding kit remains the most up-to-date kit for welding reinforced belts intended for especially long lines or standard heavy loads. Dies are available for V and Round sizes, RidgeTop, SuperGrip, MultiGrip and Double-V sections.

Mini VaR Tool Kit

This compact kit combines all the tools necessary to work with non-reinforced Round belts up to 8 mm (5/16") and V belts up to size 'A'.

The kit contains:

- Tool case.
- R-8 Mini-Pliers*.
- Welder and stand.
- Snippers and trimmer.

* Handles for the R-8 Mini-Pliers are available on request. Consult your VOLTA distributor for information.

VaR Belt Welding Kit (W1000)

This kit contains the tools required for welding VOLTA V and Round (reinforced and non-reinforced) belts. The F-51 Plier can weld V belts from 8/M to 32/D mm and Round belts from 2 mm (1/8") - 20 (3/4") mm.

The kit contains:

- Welder (WU-1 for 110 VAC or WU-2 for 220 VAC).
- F-51 Plier.
- D-11 Drill.
- Lowe Belt cutter.

The tools come in a rugged plastic case with pre-cut foam to hold them in place. The kit contains all your VaR welding tools together and protects them from damage.
